

# A NEW MODEL FOR BUYING METAL

STEELNOW

# You are here.

This is where the industrial magic happens. What you make comes to life within these walls, and customers depend on your promise to keep their world turning.

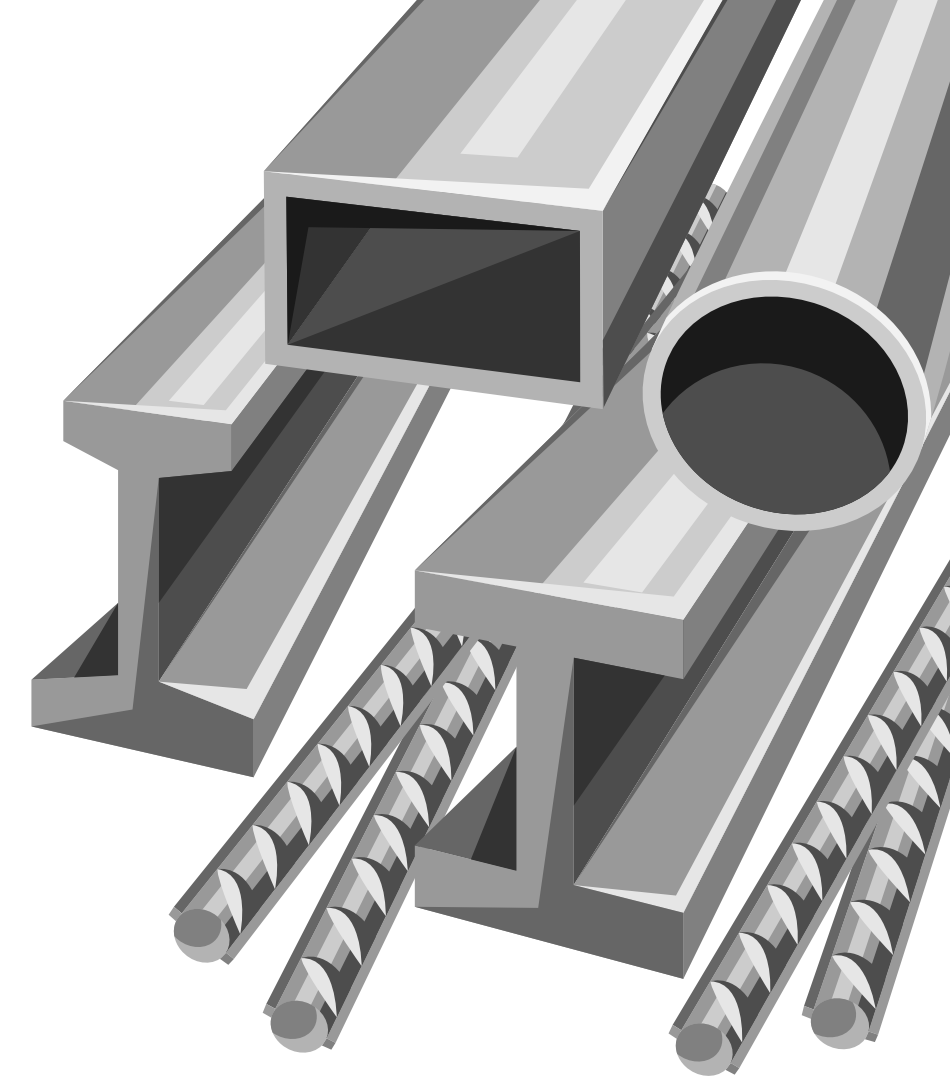

**Metal is essential to your operation, but it's getting harder to track down.**

In today's economy, the partnerships that once powered your business can't always keep up with the demands of your customers.

**It might feel like it's all on you.**

Armed with a Google search, your mission is to track down a new metal source in a sea of suppliers.

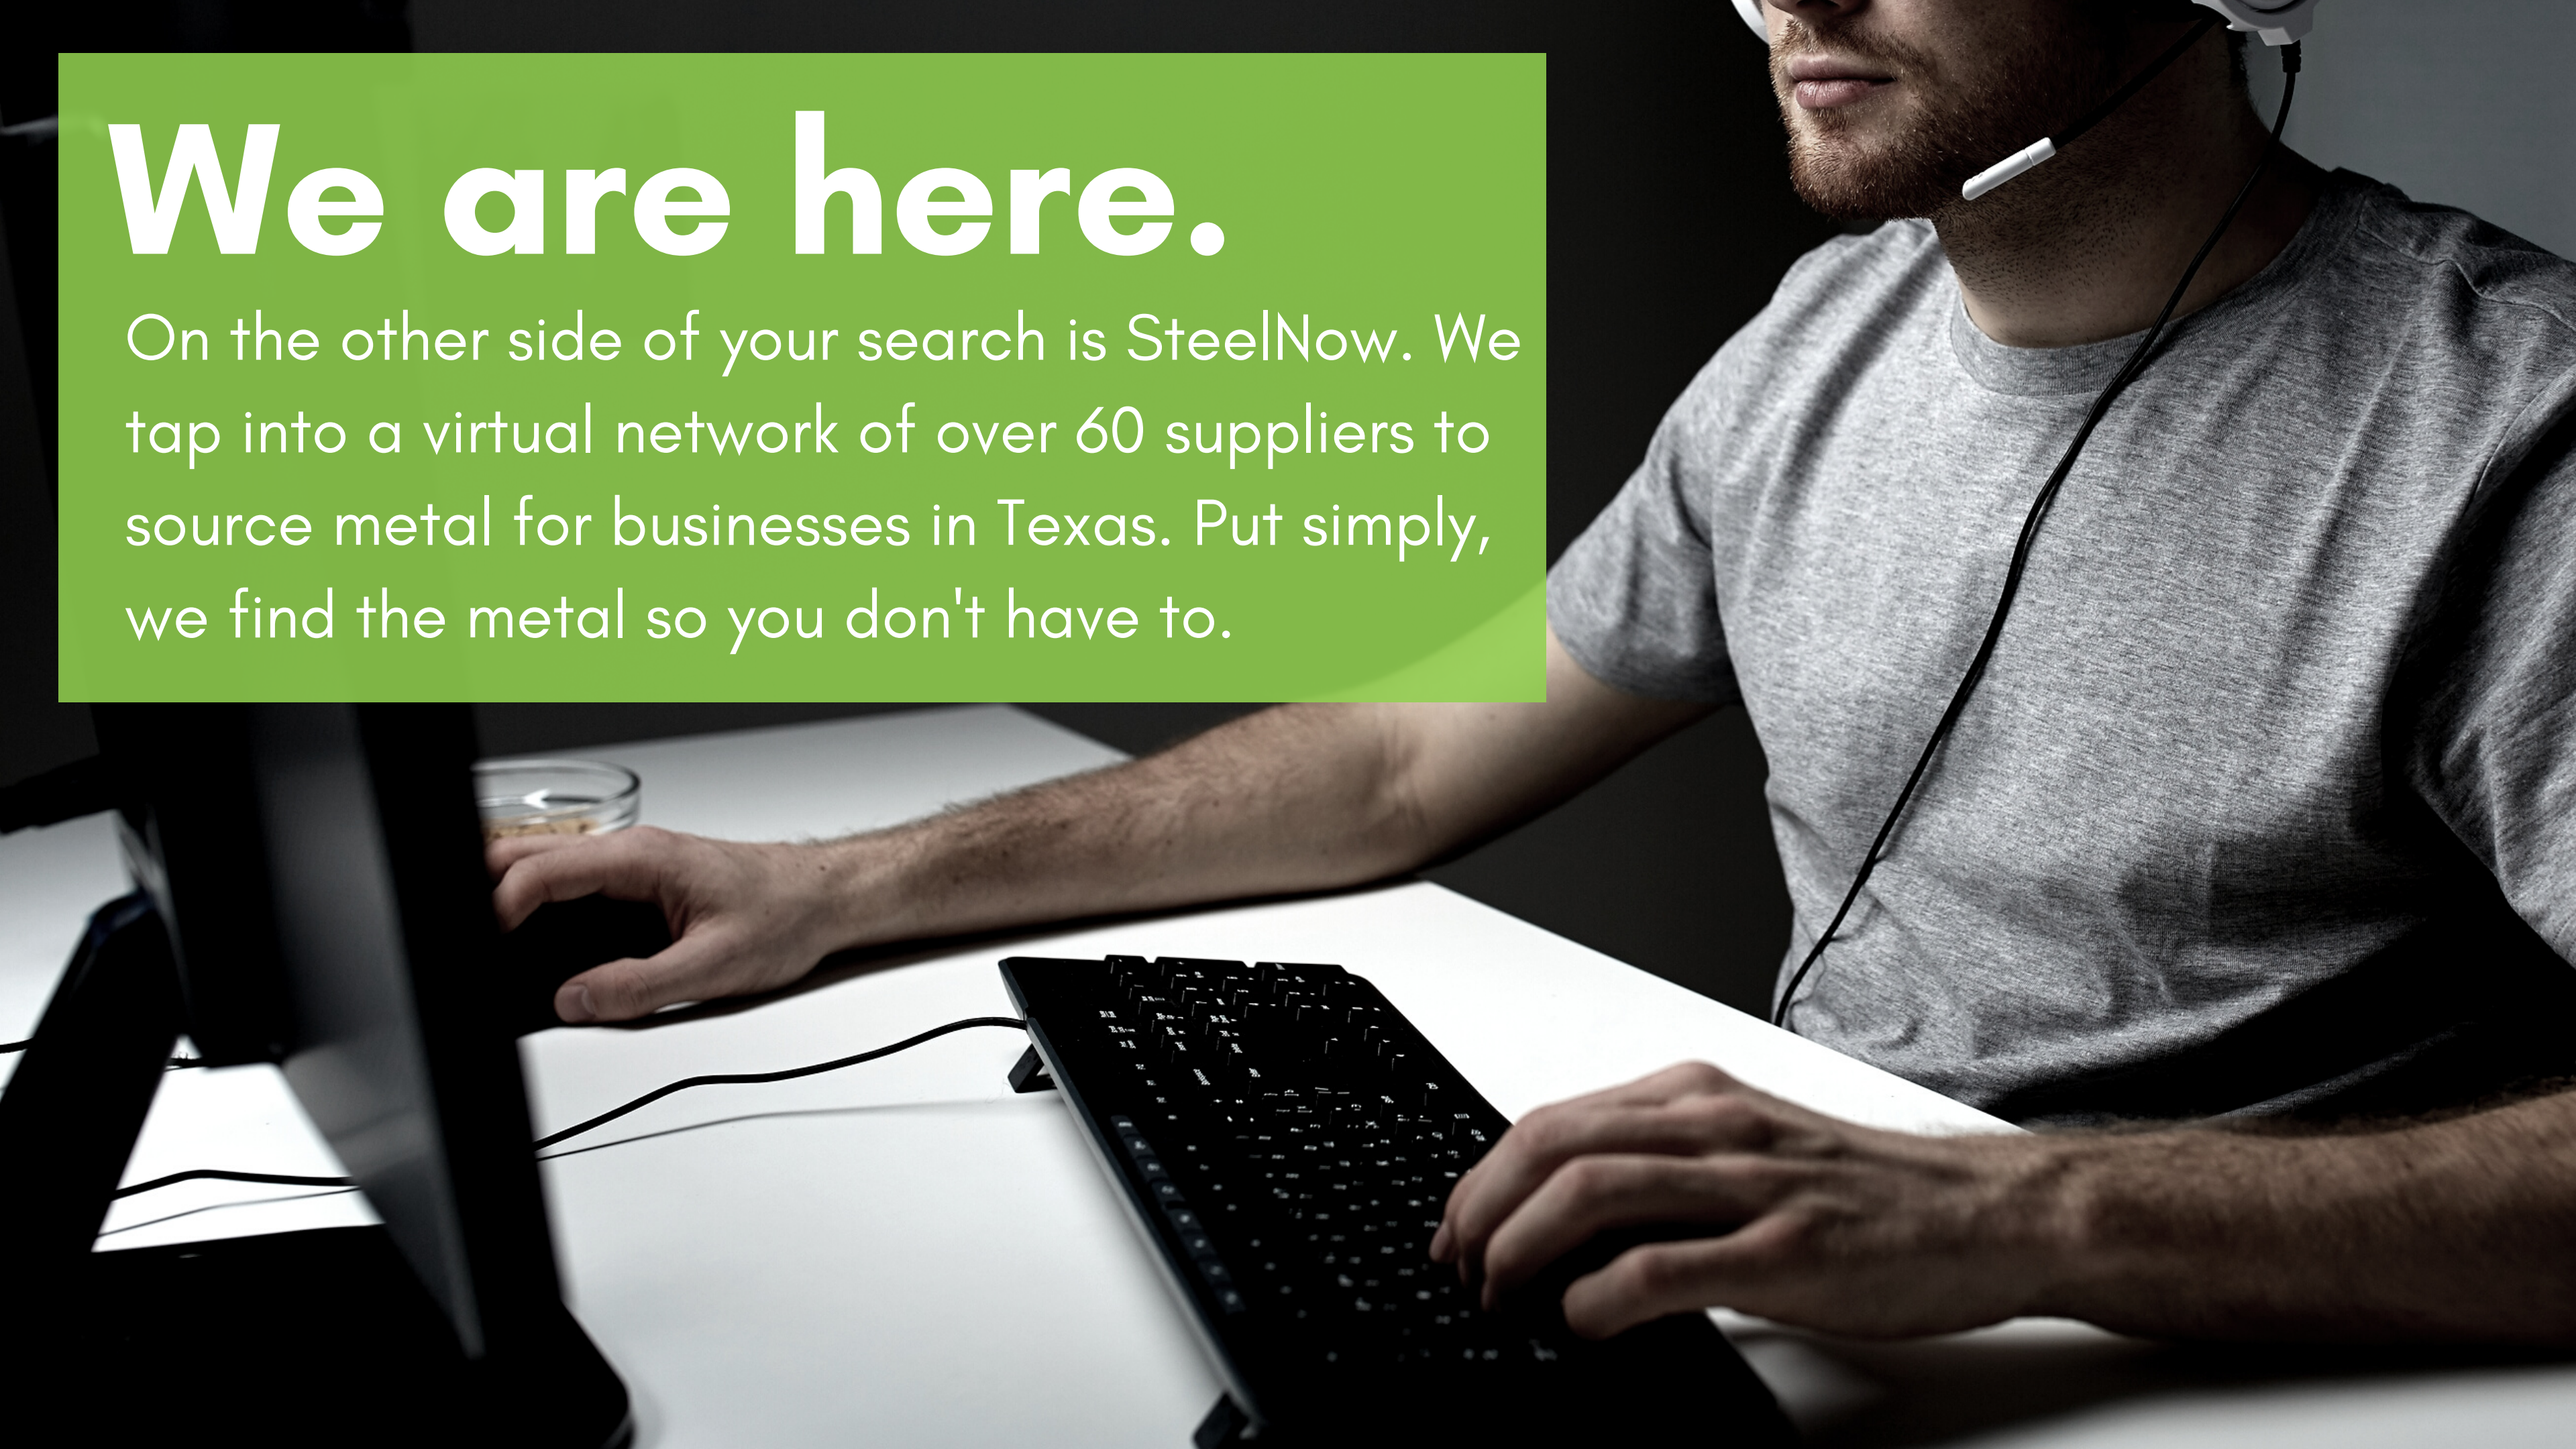

**What you need is a network that searches for you.**

# We are here.

On the other side of your search is SteelNow. We tap into a virtual network of over 60 suppliers to source metal for businesses in Texas. Put simply, we find the metal so you don't have to.

**First, let us meet you where you're at.**

Whether you're new to the industry  
and unsure where to start...

Or an industrial veteran on a time  
crunch when your usual suppliers  
don't come through...

## **We know what you're up against.**

The metal market in Texas is vast, and each supplier carries a unique array of inventory with varying lead times. As your metal needs vary in type, quantity, and urgency – a single new supplier may not meet your needs every time.

## **Here's how we can help.**

Understanding that every job or project can differ, we tailor our quotes to fit your requirements:

**YOU SUBMIT  
THE QUOTE**

**WE FIND THE  
METAL**

**WE ARRANGE FOR  
DELIVERY OR PICKUP**

## Call it smart steel.

All we need is a description, then we're off to **our network of over 60 suppliers** to find material with a lead time and price that best fits your needs. Then, we get back to you with a quote and discuss how it works for you.

**It's that simple, every time.**

### Where are We?

SteelNow doesn't have a physical warehouse. Instead, we work with our virtual network to find and deliver direct from our suppliers to you.

**STEELNOW**

# You're back at it.

Working with SteelNow means getting the metal you need on your terms - saving time and empowering your business to create the products your customers can't live without.

You have a new partner to help support your business as it grows and evolves. We'll even visit your facility to follow up on orders and discuss how we can better serve your needs.

Switching up your supply chain may seem daunting, but we're here to handle the heavy lifting.

**It's a new way of buying metal, and one worth trying.**
